

Target Performance Management Policy

In order to achieve the target performance, the following policy must be implemented :

- **store** each dialogs and inferred *intents* and *entities* in a *database*
- **transform and load** (ETL) the raw data in a *datawarehouse* in a *format compatible with the LUIS service*
- daily **re-train** the *language understanding model* with the new *intents* and *entities* of the **successful** bookings

Target Production Architecture
